# Compatible with all Wallbox Energy Management Solutions

Upgrades that save money and energy.

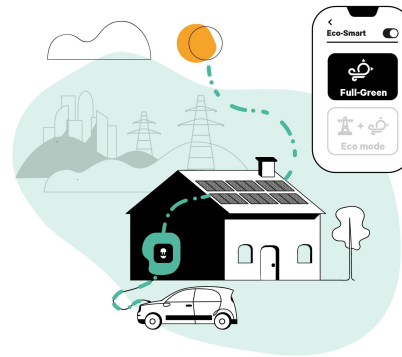

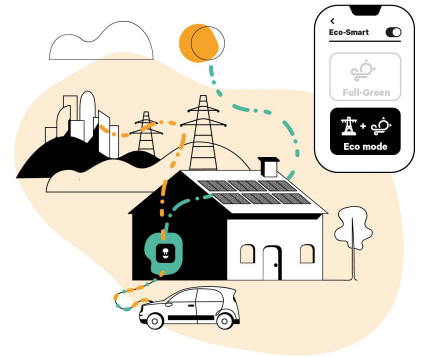

WALLBOX ENERGY MANAGEMENT SOLUTIONS

# Solar EV Charging with **Eco-Smart**

Avoid high grid prices by charging with solar energy from a building's PV system. Choose between two modes—charge with 100% solar energy or a mix of solar and grid energy.

100% Green energy

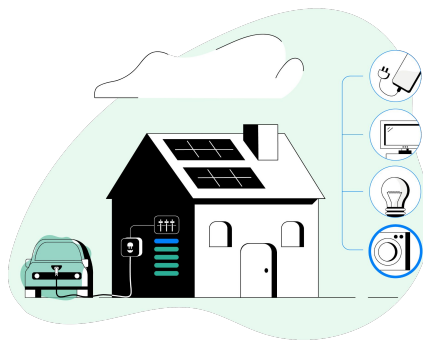

Green energy + Grid energy

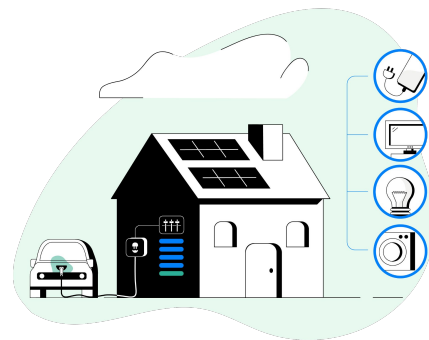

WALLBOX ENERGY MANAGEMENT SOLUTIONS

# Dynamic Load Balancing with **Power Boost**

Charge at the highest speed possible without upgrading the electrical infrastructure. Power Boost balances the power between car and building to charge efficiently and safely.

**Few appliances on.  
High charging power.**

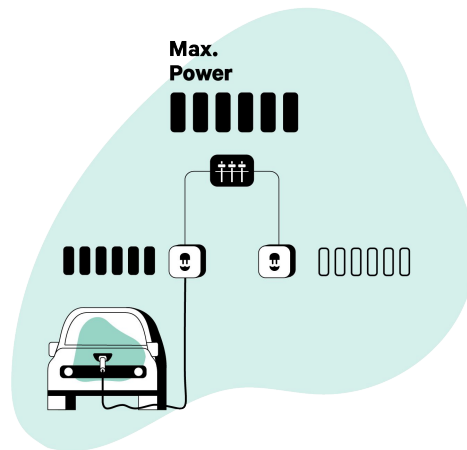

**Many appliances on.  
Low charging power.**

WALLBOX ENERGY MANAGEMENT SOLUTIONS

# Dynamic Power Sharing

Built-in load balancing allows users to charge multiple electric vehicles at once by distributing power intelligently across connected chargers. Up to 25 chargers!

# Choose the Commander that's right for you

## Commander 2

€990
